Signature and stamp of physician/nurse practitioner/physician assistant/school official
PHYSICAL SIGNATURE & STAMP REQUIRED

Date

The only circumstances under which a student may be exempted from the Massachusetts Immunization Law are as follows:

- Certification in writing by an examining health care provider who is of the opinion that the student’s physical condition is such that their health would be endangered by one or more of the immunizations. The student will be required to submit laboratory evidence of immunity to measles, mumps, and rubella; if not immune, they will have to leave campus in the event of an outbreak; OR
- The student states in writing that the required immunizations would conflict with their religious beliefs. It is recommended that they present evidence of immunity, as above. Otherwise, they will have to leave campus in the event of an outbreak.

Student to complete Student Vaccine Exemption form. The Massachusetts Department of Public Health requires the waiver to be renewed annually.
